**DETAILED ACTION**

1. Claims 6-11, 13, 15-24 and 30-39 are pending as amended on 3 July 2007, claims 1-5, 12, 14 and 15-29 being cancelled.
2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

***Response to Amendment***

3. Applicant's amendment, filed 3 July 2007, particularly removing the duplicate Markush members from claims 15, 23 and 30, clarifying the amount of cationic surfactant required in independent claim 15 and clarifying the dependency of claim 11 has been fully considered and is corrective.

The objection to claims 15, 23 and 30 because of informalities has been withdrawn.

The rejection of claims 6-11, 13, 15-22, 34 and 37 under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention has been withdrawn.

***Claim Rejections - 35 USC § 102***

4. Claims 23, 24, 30 and 38 stand rejected under 35 U.S.C. 102(b) as being anticipated by WO 94/17154 (Thomas hereinafter).

Art Unit: 1712

Thomas teaches a method of removing particles from a wellbore, such as in a drilling method, which comprises using a surfactant within the scope of the present invention (see the compound at page 10, lines 20-25). The composition comprises a fatty acid or salt (claim 4), and an acid such as sulfuric or hydrochloric acid is added at various points of use, which supply the anion X (page 7, lines 23-31). Since Thomas teaches the same composition as instantly claimed it would clearly reduce friction as in claim 30.

***Double Patenting***

5. Claims 31-33, 36 and 39 stand provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-4, 12 and 13 of copending Application No. 11/701353. Although the conflicting claims are not identical, they are not patentably distinct from each other because although the claims of 11/701353 do not specify the amount of salt or surfactant, it would be obvious to one of ordinary skill to vary the concentrations thereof, in order to obtain optimum fluids for various well treatments.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

***Response to Argument***

6. Applicant's arguments filed 3 July 2007 have been fully considered but they are not persuasive.

Applicant argues that Thomas fails to teach the instant invention in teaching a combination of an amphoteric and a cationic surfactant and a foaming operation; however, the inclusion of the amphoteric surfactant is not precluded from the language of the claims, which use the transitional term 'comprising', which is inclusive or open-ended and does not exclude additional, unrecited elements or method steps such as the amphoteric surfactant or foaming the composition.

Applicant argues that Thomas fails to teach the instant invention in not teaching suspending particles in the aqueous fluid; however, Thomas' teaching of removal of particles from the wellbore and subsequent removal from the composition read on the instant limitation of suspending particles.

Applicant still further argues that the fatty acid is useful in collapsing the foam; however, the Examiner in the previous Office action was pointing to the fatty acids and sulfuric acids as reading on the limitations of "at least one additive selected from the group consisting of ... organic acids" and "X is selected from the group consisting of...oxo ions of...sulfur" respectively.

#### ***Allowable Subject Matter***

7. Claims 6-11, 13, 15-22, 34 and 37 are allowed for the reasons of record.  
Claim 35 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

1. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
